

SCORE YOURSELF

Check your answers against the answer keys. Count up the number of answers you got right and the number you got wrong.

SECTION	NO. RIGHT	NO. WRONG
Quantitative (Math)		
Reading Comprehension		
Verbal		

Now calculate your raw scores:

Quantitative (Math): $(\quad) - \left(\frac{1}{4}\right) (\quad) = (\quad)$
 No. Right No. Wrong Raw Score

Reading Comprehension: $(\quad) - \left(\frac{1}{4}\right) (\quad) = (\quad)$
 No. Right No. Wrong Raw Score

Verbal: $(\quad) - \left(\frac{1}{4}\right) (\quad) = (\quad)$
 No. Right No. Wrong Raw Score

Now check your Raw Score against the conversion charts to get an idea of the range in which your test scores fell:

Raw Score	Quantitative (Math)	Reading Comprehension	Verbal
60			800
55			800
50	800		779
45	782		752
40	755	800	725
35	725	722	698
30	698	692	671
25	668	662	644
20	641	632	617
15	614	602	590
10	584	572	563
5	557	542	533
0	530	512	506
-5 or lower	500	500	500

Remember:

- The same exam is given to students in grades 8 through 11. You are not expected to know what you have not been taught.
- You will be compared only to students in your own grade.

Use your scores to plan further study if you have time.
